Juggle all your AP needs - Pivot easily into new opportunities.

Help your staff handle more - Stay lean and responsive at scale.

Seamlessly
syncs with

*Based on a 2021 survey of over 2000 BILL customers.

BILL is the trusted leader in AP automation

Partnering with BILL provides a turnkey automation solution for your AP. It doesn't require special training to use, and most companies are ready to pay their first bill in just a few minutes. Here's how it works.

Automatic invoice capture

Email an invoice directly to the app, snap a photo on your phone, or scan it and drag it to your inbox. BILL's AI reads and enters the data for your review, checks for things like duplicate invoice numbers, and flags any issues.

Streamlined approvals

Set up your own unique workflows with as many rules as you need. BILL finds the right rule for each transaction and sends the invoice to the right people automatically. Approvers can even handle those approvals on their phone.

Cloud-based, digital invoice management

Check the status of any bill from the easy-to-use BILL dashboard. If approvers have questions, that's easy, too. Every communication is stored with the invoice itself, so you don't have to dig for what you need.

Multiple payment options

When you're ready to make a payment, send an ACH, virtual card, international wire, or even a paper check, all from the app. BILL will print and mail that check for you without any need for a manual signature.

Data integration

BILL integrates with top accounting software to link key data in both systems. Everything stays up to date, so reconciliation is easier than ever.

Ultimate transparency

Every invoice touchpoint is stored in a timestamped audit trail. With the visibility and transparency BILL provides, you'll know that every procedure was followed, and every invoice and payment was properly accounted for.

Enhanced security

BILL is designed with your privacy and security in mind at every level — application, payment, network, and data — from our encryption and cipher suites, to the payment protections that are built into the way the platform operates.

With so many benefits, it's no surprise that growing businesses turn to BILL to automate their invoice processing.
