

DIVVY EXPENSE MANAGEMENT

# Expense Management at your fingertips.

Get more control over all the ways your business spends, all in one place.

# One solution to manage out-of-pocket expenses, card spend, and more.

## Corporate cards for every employee

Avoid the hassle of passing a corporate card around. Every employee gets a card with a set limit, so you can track spend by employees instantly — and reimbursements are easy and free.

## Live transaction dashboard

Review all transactions in real-time as they flow into your dashboard. No more waiting until the end of the month for visibility.

## Mobile receipt upload for reimbursements

Rather than waiting to hand in receipts, spenders can submit for reimbursement right from the Divvy mobile app. Plus, you have the documentation you need for every transaction.

## Send or request funds from pre-determined budgets

Stop overspending before it happens. Reimbursements pull from appropriate budgets, where budget owners control who has access and how much they're allowed to spend.

## From swipe to books

Expenses are automatically reported and tracked against the existing budgets—no need for receipts. Accounting integrations allow for a total view of your business finances.

## Payroll payouts

Reimburse employees through your payroll system.

*“What used to take 90 hours a month, takes two. Card users get a notification, take a picture of their receipt from the app, and we close the books.”*
